# System Information & Event Management

#### Security Operations for the Modern Enterprise

#### All Data is Secure Data

### **Delivering Disruptive Economic Value**

- \* Available in Milliseconds
- \* Predictable scale

**INDUSTRY FASTEST &** MOST SCALABLE **INGESTION** 

150k EPS/Core

#### **STORE**

- \* Optimized file structure
- \* Micro-indexing
- \* Data in raw format
- \* 15 to 1 compression

**ELIMINATE DATA MANAGEMENT** OVERHEAD

80% Fewer Resources

#### **ANALYZE**

- \* All data is hot
- \* Self-optimizing queries

LESS TIME TOOLING,

MORE TIME

**ANALYZING** 

1M EPS/Core

\* MI-based anomaly

- \* Visual interaction
- No-code analytics
- \* Std. query language for power users

**OPERATIONAL** INSIGHTS FOR EVERYONE

Self-service analytics

#### **Extending Security Analysis Beyond IT**

- \* Unified security view of IT and Business applications
- \* Real-time threat detection and forensics
- \* Perform analytics and visualization for historical data

### System Information & Event Management

#### **Built With No Compromise Architecture**

## Multiple Use Cases, One Platform, All The Data

## **Built On A No-Compromise Architecture**

ANY DATA SOURCE, ANY FORMAT, MULTIPLE TBs to PBs PER DAY
